

## ParKlear™ Bag Filter Vessel

Versatile and effective filtration system for water and process fluids.

ParKlear™ Bag Filter Vessels offer an easy and economical way to remove dirt, scale, grit, and other contaminants from downstream processes. Engineered for flow rates up to 5,000 gpm per vessel, our bag filter technology includes single-bag filter housings, multi-bag filter housings, duplex bag filter systems, and made-to-order bag filter systems. Bag filters are available in nylon, polyester, polypropylene felts, multi-filament material, cotton mesh, teflon, and gore-tex in sizes 0.5 to 2000 microns. The unit uses standard #2 filter bags, but can accommodate nearly any liquid bag filter on the market.

### Applications Include:

- Bio-diesel filtration
- Wastewater filtration
- Ink
- Paint
- Drilling fluids
- Car wash sumps
- Sugar solutions
- Cutting fluids
- Water processing
- Chemical processing
- Petrochemical operations

### Features:

- Carbon steel, 304 stainless steel or 316 stainless steel housings
- ASME code or non-code vessels available
- Bag filters available in a variety of media in sizes 0.5-200 microns
- Uses standard #2 filter bags, but can accommodate nearly any liquid bag filter on the market
- Flow rates up to 5,000 gpm per vessel
- Skid mounted duplexed units are available
- Wheel or hydraulic jack headlift
- Swing bolt lid closure
